

Proceedings of EWA/ÖWAV conference “Sewage Sludge Disposal” published

The proceedings of the conference "Sewage Sludge Disposal - Sustainable and/or Reliable Solutions", organised jointly by the Austrian Water and Waste Management Association (ÖWAV) and the European Water Association (EWA) on 10 and 11 September 2001 are now available.

The proceedings comprise the following lectures:

- J. Le Moux, A. Gazzo: Disposal and recycling routes for sewage sludge: Sociological acceptance in Europe
- H. Hahn: Agricultural use of sewage sludge – a controversial issue
- H. Bode, N. Schmitt : New Sludge disposal concept 2000 of the River Association Ruhrverband
- P.H. Brunner: The role of sewage sludge in the context of the regional materials management
- R. Böhm: The hygienic aspect of sludge application in agriculture
- T. Evans: Marketing of sludge and quality assurance
- O. Borraz: The socio-economic problem – how to co-ordinate the many different interests and players affected by sludge application in agriculture
- P. Piekema: P recovery from sludge (in the context of P management)
- Ch. Leitzinger: Sludge disposal of the city of Zurich (co-incineration, actual and future options)
- F. Klager, H. Kroiss, F. Tikovsky: Raw sludge incineration in Vienna (3 Mio PE) and its implications on waste water treatment (20 years of full scale experience)
- P. Balmér: Sludge treatment and disposal strategies in Sweden
- S.E. Jepsen: Sludge handling and disposal strategies in Denmark
- Th. Schmidt : Sludge disposal management in the context of regional waste management
- M. Pollak: Soil protection aspects of sludge application in agriculture

The proceedings are published by the Institute for Water Quality and Waste Management of the Vienna University of Technology in the series “Wiener Mitteilungen”, Volume 171, for 25 EUR (plus shipping costs).
